

- Quick guide

1 Load Batteries

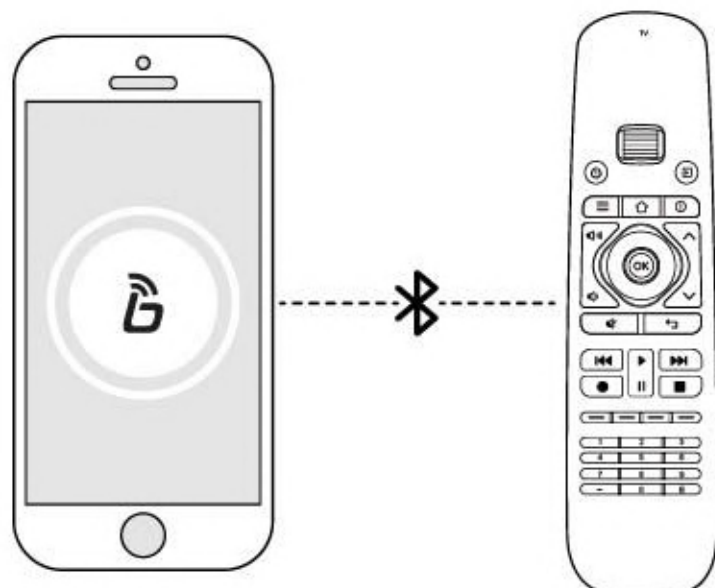

2 Download “SofaBaton” App

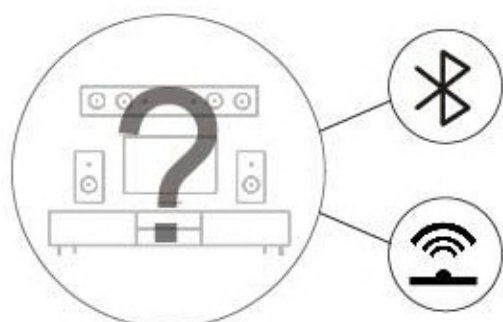

SofaBaton

3 Connect Remote

4 Add Device

1. Not support Wifi Devices
2. Some devices are compatible with both IR and Bluetooth

* Determine if your devices support IR or Bluetooth?

IR:

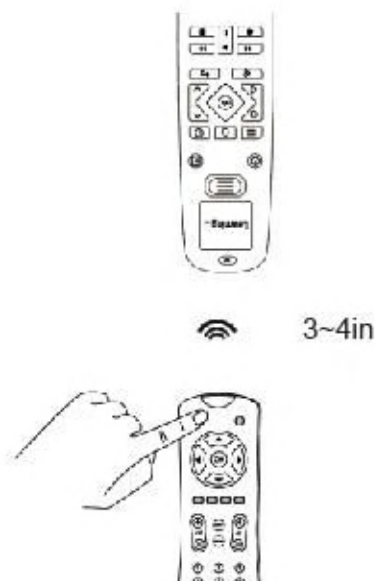

If you have the original remote, we suggest you jump to step 5, otherwise jump to step 6.

Bluetooth:

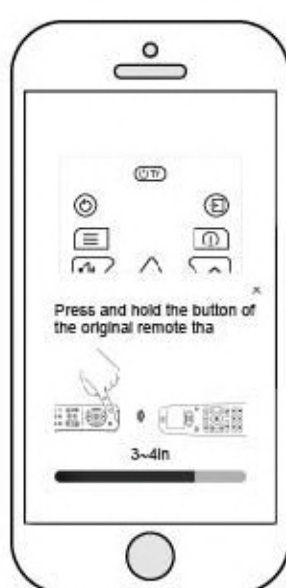

Bluetooth devices users please go to step 7 directly.

5 Via IR Learning Mode

1

2

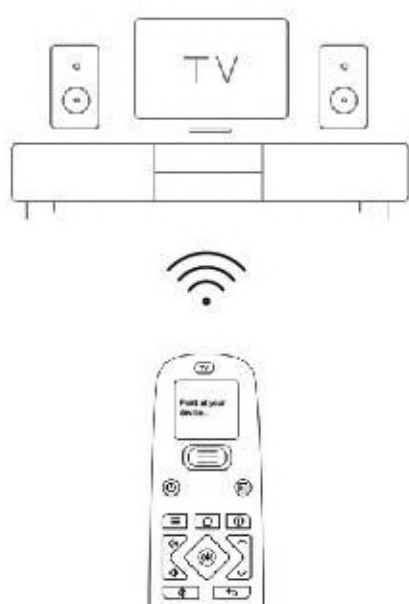

* Keep U1 Line-of-Sight with your original remote, select the Icon of the function key that needs to be copied. Meanwhile, long press the corresponding function key of the original remote. If the App notifies you it's successful, means completed. If not, please try again.

6

Via IR Matching Mode

1

2

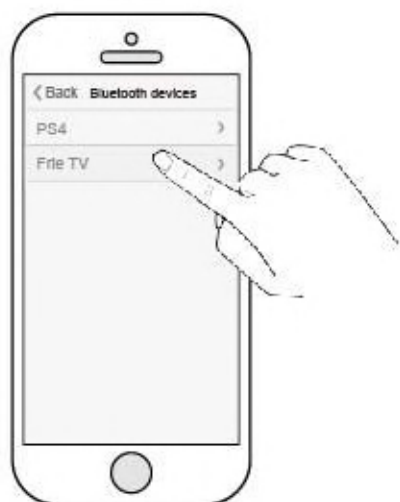

- * Keep U1 Line-of-Sight with your device, clicks the  firstly and then choose or to see if it works. During the process, the U1 remote control will emit infrared signals to the device. And U1 will be able to find proper code set after searching database.

7

Via Bluetooth Mode

1

2

- * If you add a new Bluetooth Device, the App would be disconnected from your U1 first. Meanwhile, you can connect your U1 with your phone to complete the remaining steps of adding a new device.

8

Upon adding new devices

Reassign Remote Keys
Configure Macro Keys

9

Start Using

* Scroll to the desired device and start using.
